20th March 1992.

Dear Mr President

I am writing to express my deep concern about the military operation to evict the Mapuche - Pehuenche from the Quinquen area of Bantín province.

The enforced displacement of the people from their ancestral lands will destroy their community and livelihoods. As you are aware the Pehuenche have lived here for thousands of years and the Araucaria tree (pehuen) provides them with a major source of income as well as forming part of their heritage and spiritual life.

These people are prepared to die in order to defend their rights to their territory. To prevent a gross human rights violation, I urge

You to take action that will  
allow the Pahuiche to continue  
living peacefully in their land.

Yours sincerely,

Belia Stephenson.

Dear Mr President

I am writing to express my very deep concern about the imminent military operation to evict the MAPUCHE-PEHUENCHÉ from the Quinquen area of Cautin province. The enforced displacement of the people from their ancestral lands will destroy their community and livelihoods. The Pehuenche have lived in this region for thousands of years and the Pehuen provides them with a major source of income as well as forming part of their heritage and spiritual life.

The Mapuche-Pehuenche are prepared to die in order to defend their rights to their territory. In order to prevent a gross human rights violation we urge you to take action which will allow the Pehuenche to continue to live peacefully in their land.

Yours Sincerely

P.A. MALLIN.

Dear Mr President,

I am writing to express my deep concern for the Mapuche-Pehuenche people, threatened with eviction from their ancestral lands.

I am told that your government has now bought these lands & trust that these people will be allowed to remain where they have lived for thousands of years.

Sooner than allow a terrible  
injustice we urge you to  
allow these good people to continue  
living peacefully in their land.

With my good wishes for  
your country & your people,

Pamela Hayden
