I am writing as an individual concerned about human rights violations. I have learnt of numerous cases of disappearance, torture and summary executions that took place during the years of military rule in Chile and am anxious they should be investigated.

The apparent impunity accorded to those responsible for human rights violations is very worrying and thus I request the repeal of the 1979 Amnesty Law which has prevented full investigations into abuses committed before 1978.

Thorough investigations into human rights abuses is essential both for justice, and as a preventative measure against future rights violations.

Yours Sincerely, G Dale
